DETAILED ACTION

1. This action is in response to applicant's amendment filed on May 17, 2006. **Claims 1-54,56-57,59-70** are now pending in the present application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 57, line 1, change "claim 55" to claim --54--

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: the application is allowable for the reasons set forth on pages 10-11 of the Applicant's response filed on May 17, 2006.

Regarding claims 1 and 54, as noted therein, the claimed invention requires *inter alia* an insert and master clip having an insertion point wherein the insert clip is combined with said master clip to create an output clip with undetectable transitions and wherein the insert clip and master clip is encoded into a degraded frequency response compressed format whereas the closest prior art Bodnick and Wine et al. only teach of seamless spicing an insert clip and master clip and do not teach or suggest the insert clip and master clip being encoded into a degraded frequency response compressed format wherein each packet holds information only for a time duration of each respective packet.
